## Frequently Asked Questions

### Q: Do you sedate cats?

A: No, we do not sedate cats as we handle cats in such a way that they rarely need any kind of sedation. Most cats that are being sedated to be groomed are actually quite compliant in our process.

### Q: How often should cats be groomed?

A: Every 4 weeks or less as this makes for a healthy, happy cat. It will cut down on shedding, hairballs, matting, and will reduce allergens produced by your cat. To remove dander/dandruff, we recommend every 1-2 weeks.

### Q: Are there risks involved in grooming severely matted cats?

A: There are risks involved when grooming ANY cat. There is a risk of cutting the skin of an elderly or sick cat, especially if they are severely matted or have a pelted coat. Of course every precaution is made to prevent this. Remember, prevention is the key! If your cat has regular professional grooming, matting of any kind will almost never happen!

### Q: Can I help or watch?

A: Because cat grooming can be dangerous, we need all of our attention on the task at hand. When owners are around, sometimes the cat will become more anxious about the grooming process. It is our intention to provide a calm environment free of distractions. You are welcome to hang out in the lobby as we work, but typically we ask for a 2-4 hour window per cat.
